## **DETAILED ACTION**

1. Claims 1,22-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johansson et al (5,277,764), Andersson et al (5,607,552) or Keiser et al (6,486,216).

Johansson et al discloses that prior art colloidal silica or silica sol have a S value of 8-45;  $SiO_2: M_2O$  of between 20:1 and 75:1; and a specific surface area of between 10 and 1000  $m^2/g$ , which includes sols modified by Al. Johansson et al lists patent documents which show these sols, see last paragraph of column 3 spanning column 4. Andersson et al and Keiser et al also show sols having the properties as noted above and which encompasses the specific area, S values as claimed.

The references are silent as to the viscosity but since viscosity is dependent on such factors as particle size and specific surface area, it is obvious that since the S values and specific surface area of the above prior art sols are within the claimed range, the prior art obviously encompasses the claimed viscosity.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Chin whose telephone number is (703) 308-2046. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven Griffin can be reached on (703) 308-1164. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-7718 for regular communications and (703) 305-3599 for After Final communications.
